

# BATS

Many people think bats are scary animals. They are actually very interesting creatures. Bats are mammals. They are the only mammal that can fly. Bats keep warm by folding their wings around their bodies. This traps air against their bodies. Bats are nocturnal. This means they sleep during the day and they are active at night. Bats sleep upside down. They have claws that help them hold onto cave walls and trees. Bats do not see very well so they use echolocation to find their way at night and to find food. They make a noise and wait for the sound waves to bounce back off an object and make an echo. The bats can tell how far away an object is by how long it takes the echo to come back to them. Bats are very helpful to farmers.

They catch many of the insects that eat the farmers' crops. They also carry pollen from plants, which helps plants to make seeds. Bats are amazing animals!
