

Letter to my 4th grade students:

Dear students,

One more school year of your life has come to an end. However, we will not forget this one easily.

Your families, teachers and you have been through a lot over the last few months. Nobody could have imagined what was going to happen after that 12th of March, when they told us “the school has been cancelled and there is no class until further notice”.

Suddenly, life became like an American apocalyptic film. However, we remained home for more than 40 days (that is what quarantine is) and we continue living our lives in a total different manner. Our rooms became classrooms, our living rooms became offices, your parents were your teachers and your classmates and teachers were behind a screen. What a mess!

Yet, this experience has shown us that no matter how difficult circumstances are, you are always able to overcome those problems. You need to remind this lesson and whenever any new challenge appears in your life, as the song says, you will tell yourself “I WILL SURVIVE”.

All the best,

Teacher Patri
