END OF THE YEAR PROJECT (voluntary)

Boys and girls, this is the last week and I suggest you to make a little end of the year project for those who want to do it. It's a voluntary job.

The idea, is to make a little PPT (Power Point) presentation about an animal that fascinates you (it can be your favourite one or not); it's your choice. If you don't know how to use Power Point, you can do it with a different tool.

Remember, you have lots of information and language about ANIMAL DESCRIPTION in the document that I send you a few weeks ago (25th-29th of May).

The information you must include is:

1- *NAME* (You can include the scientific name)
2- **TYPE** (mammal, reptile, fish, domestic, wild, etc).
3- **BODY PARTS** (How do they look?)
4- **ABILITIES** (What can they do?)
5- **FEEDING** (what do they eat?)
6- **HABITAT** (WHERE DO THEY LIVE")
7- **OTHER CHARACTERISTICS** and **CURIOSITIES**

Of course, the power point has to include some good **images** that illustrate the information.

You have some examples of ocean animal presentations that some students did on this link:

http://englishlesroquetes.blogspot.com/p/power-points.html

These are made by 5th grade students, but they can give you some ideas.

If you need some help, let me now at teacherpatri2@gmail.com

Send me your project to the same e-mail.

Thank you!
