

# My model building

Architects get inspiration from the world around them. They think of new ways to design new buildings.

## Step 1

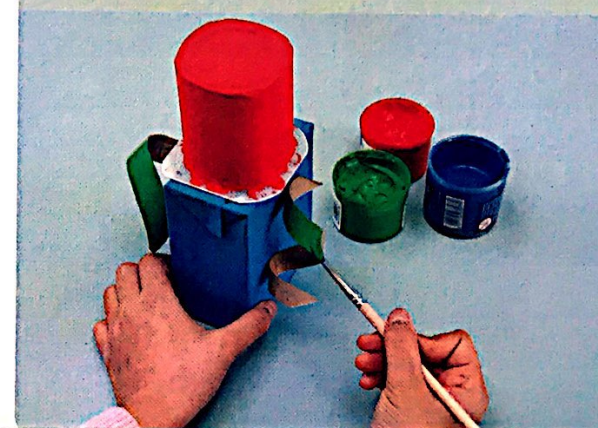

Choose materials for your model.

## Step 2

Glue.

## Step 3

Paint.

Finished? Draw a picture of your building. Plan the windows, doors and other details.

# My building in the city

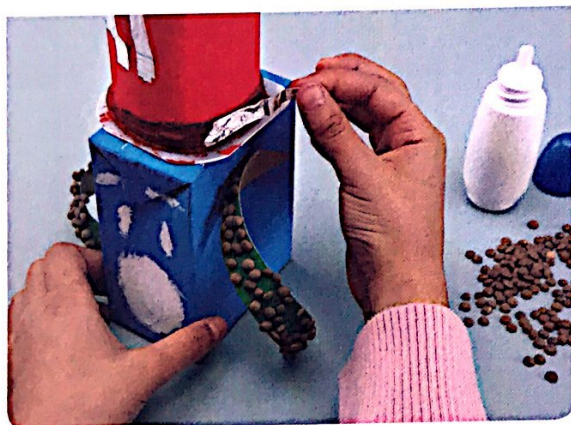

What lines, shapes, colours, patterns, textures and forms can architects use to design new buildings?

Next step: Work together to make a city.

## Step 4

Add details to your buildings.

## Step 5

Add a sign.

## Step 6

Make roads for your city and add your buildings.

Finished? Colour the roads and the area around your building.
