François Delarozière and Pierre Orefice are the designers of these amazing mechanical animals. They are called the Machines of Nantes Island, and they "live" in a museum on the River Loire. There are sea animals, giant birds and an 11-metre-tall mechanical elephant in the museum.

The elephant is special. It weighs about 40 tons and you can climb onto it and ride around the city on it. It is definitely a fun and exciting way to see the city.
