

## IES URBANO LUGRIS ERASMUS POLICY STATEMENT

By participating in the Erasmus programme, IES Urbano Lugrís aims to gain an international focus through:

- 1.- Attaining work placements in companies of EU/non EU countries
- 2.- Attaining educational and training mobility within EU/non EU countries

### 1.- Attaining work placements in companies of EU/non EU countries

The purpose of IES Urbano Lugrís Erasmus programme participation is the attainment of work placements, initially in European countries, which are equivalent to:

"Professional Module: training in job centers" (22 credits)

This programme is aimed at second-year students in higher vocational training

#### - Selection of companies

The selection criteria for companies where students undertake work placements are based on:

- \* Suitability of vocational specializations taught at the center
- \* Professionalism
- \* Their target market
- \* Future employment prospects for students within those companies

Companies are selected through:

- \* Schools which have the same kind of vocational training as the ones we have already contacted through: The Leonardo programme, the international Comenius teacher training courses which coordinates the IES Urbano Lugrís, or international teacher training courses and exchanges. This ensures a first-hand reference of the companies that are going to employ our students.
- \* Specialized Agencies

#### - Geographical scope:

The geographical scope will be limited to countries within the European Union where students have the opportunity to improve their English at work. In the future this could ideally be extended to countries outside the EU.

#### - Mobility aims:

- \* Improving qualifications of trainees taught at the school
- \* Facilitating students' employability
- \* Improving their language skills
- \* Improving their skills in the use of new technology
- \* Giving our teaching a European focus
- \* Facilitating our students' incorporation in an increasingly demanding labour market
- \* Attaining qualified professionals trained according to current demands of the European Union

#### - Mobility of the target group:

Second-year students in higher vocational training attending the following specialization courses:

- . CS for Telecommunications and IT Systems
- . CS Electrotechnical and Automated Systems
- . CS Industrial Automation and Robotics
- . CS Electronic Maintenance

### 2.- Attaining educational and training mobility within EU/non EU countries

The aim of IES Urbano Lugrís participation in the Erasmus programme is the attainment of studies/training at foreign schools, initially within the European Union, which could improve both our staff's as well as our students' education.

This programme is intended for second-year students in higher vocational training and their teachers.

- Selection of schools

The criteria for the selection of schools where our students and staff undertake studies/training are as follows:

- \* Suitability of the vocational specialization taught at the school
- \* Professional recognition
- \* International focus
- \* Use of new technology
- \* Facilities included (accommodation, language ...)

- The schools where students study/trains:

- \* Schools which have the same kind of vocational training as the ones we have already contacted through: The Leonardo programme, the international Comenius teacher training course which coordinates the IES Urbano Lugo, or international teacher training courses and exchanges. This ensures a first-hand reference of the companies that are going to employ our students.
- \* Universities/schools that offer courses related to the ones taught at our school

- Geographical Scope:

The geographical scope will be limited to countries within the European Union where students have the opportunity to improve their English at work. In the future this could ideally be extended to countries outside the EU.

- Mobility aims:

- \* Improving our students and staff's professional skills
- \* Facilitating student's employability
- \* Improving their language skills
- \* Improving their skills in the use of new technology
- \* Giving our teaching a European focus
- \* Facilitating our students' incorporation in an increasingly demanding labour market
- \* Attaining qualified professionals trained according to current demands of the European Union

- Mobility of the target group:

- \* Teachers/school staff
- \* Second-year students of higher-level specializations taught at IES Urbano Lugo
