S19. Listen to a tour guide talking about Central Park. Are these sentences true or false?

Central Park is an oasis in the middle of New York City. It is the first public park built in America. There was a competition for the design in 1858. The winners were Frederick Law Olmsted and Calvert Vaux. It is one of the largest urban parks in the world, measuring 11,2 km² and extending from 59th St and 110th St and Central Park West and 5th Ave.

It took 15 years and over \$14 million to build (about \$200 million today). Belvedere Castle was completed in 1872 as a viewing pavilion over the Croton Reservoir. In 1934, they filled in the Reservoir and became the Great Lawn. The original Carousel, built in 1871, used horsepower. Fire destroyed it twice and the current brick structure replaced it in 1951. There are 51 sculptures in the Park and 36 bridges and arches. Bethesda Fountain was the only sculpture included in the original design of the Park — the others were gifts. The park contains 58 miles of pedestrian paths, 6.5 miles of Park drives, and 7 miles of benches (nearly 9,000). There are 21 playgrounds. They planted more than 500,000 trees, shrubs, and vines during the building of the Park. Today, there are more than 26,000 trees, including 1,700 American elms.

Central Park became a National Historic Landmark in 1965 and a New York City Landmark in 1974. More than 25 million visitors enjoy Central Park each year. Famous for its summer productions of Shakespeare in the Park, Central Park is an attraction that should not be missed.
