

Hi, everybody 😊 I am an English teacher in a public primary school in Legnica (Poland). Our pupils are 6-12 years old, and we have around 300 children. We would like to start our first Comenius Project, so we really need a coordinating school. We would be honoured to become a part of an already existing project, but we may as well participate in creating a totally new one. We are interested in history, culture, tradition, but also in geography, maintaining the child's identity in the educational system, science, etc. Contact us, if you want to learn more about us.

Contact details are:
