PROGRAMAS

The screenshot displays the Cura 15.04.6 software interface. On the left, there is a settings panel with the following sections:

- Quality:** Layer height (mm) 0.2, Shell thickness (mm) 0.8, Enable retraction
- Fill:** Bottom/Top thickness (mm) 0.8, Fill Density (%) 20
- Speed and Temperature:** Print speed (mm/s) 50, Printing temperature (C) 205
- Support:** Support type: None, Platform adhesion type: None
- Filament:** Diameter (mm) 1.75, Flow (%) 100.0
- Machine:** Nozzle size (mm) 0.4

The main 3D view shows a blue checkered platform with several yellow circular objects. A red arrow points to a printer icon in the top left corner of the 3D view, which displays the text "48 minutes" and "3.15 meter 3 gram". Another red arrow points to a scale menu in the bottom right of the 3D view, which contains the following data:

| | |
|---------------|--------------------------|
| Scale X | 2.0 |
| Scale Y | 2.0 |
| Scale Z | 1.0 |
| Size X (mm) | 26.0 |
| Size Y (mm) | 30.0 |
| Size Z (mm) | 1.0 |
| Uniform scale | <input type="checkbox"/> |

Below the scale menu are three icons representing different scaling options. The Windows taskbar at the bottom shows the system tray with the date 27/11/2017 and time 9:13.
