[illegible]

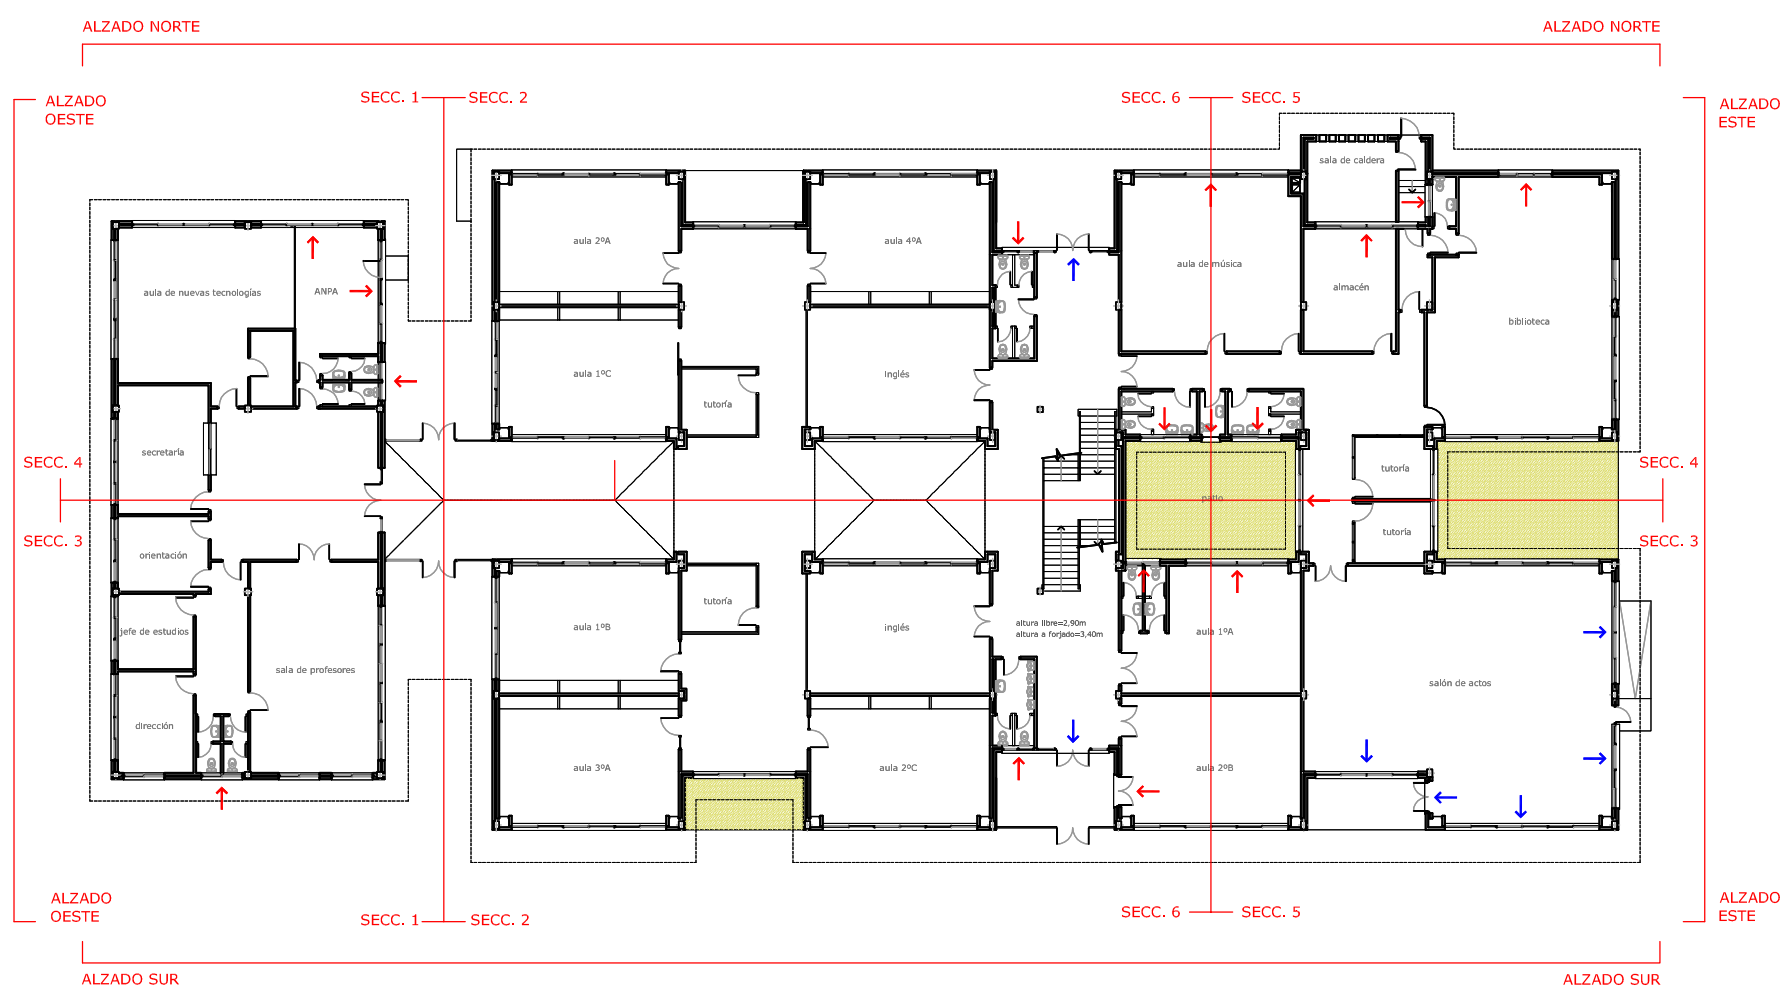

This architectural elevation drawing depicts a long, low building facade. From left to right, it features a small square window, a central entrance with a flat roof supported by two columns and a row of six small square windows above the door, a large multi-paned window, a smaller square window, a large rectangular window, another large rectangular window, a large rectangular window, a central entrance with a flat roof supported by two columns and a row of six small square windows above the door, a large rectangular window, and a large rectangular window. The drawing uses simple lines and shading to represent the building's form and window patterns.

This architectural section drawing illustrates a long, low building facade. The structure features a series of rectangular windows of varying sizes, some with internal grid patterns. A prominent sloped roofline is visible on the right side of the drawing. The drawing is a technical line drawing, likely a section or elevation, showing the internal structure and external features of the building.

aislamiento térmico de fachada mediante sistema ThermaBead consistente en inyección de perlas expandidas de EPS (Neopor de Basf)

Architectural elevation drawing of the building facade. The drawing shows a long, low structure with a prominent horizontal band across the middle. Above this band, there are several windows of varying sizes. Below the band, there are five large, multi-paned windows. The drawing is a line art representation, showing the structural elements and window placements.
